

Download

First of all, there is no such thing as Photoshop CS8 - there was CS6 and now there is a cloud version. Do you mean Photoshop ELEMENTS version 8? And what's that? You are confusing CS6 with CS4. Secondly, there is no such thing as a "deferred operation". This is when you have a picture in the process of being processed, but you put it off until you are ready to publish it. For example, you can make several layers for one image at once, and then publish them one by one. Or you make multiple versions of the same photo and post them at different times. Or you make multiple copies of the same photo and make collages out of them.
