## Abacus Math Writer

1. Supports the following version of Microsoft Word 2000 (MS Word) : - Microsoft Word 2000 (MS Word) or later. - Microsoft Word 2000 SE (Microsoft Expression) or later. - Microsoft Word 97 SE (MS Word) or later. 2. Supports the following version of Microsoft Word 2002 (MS Word) : - Microsoft Word 2002 (MS Word) or later. - Microsoft Word 2002 SE (Microsoft Expression) or later. 3. Supports the following version of Microsoft Word 2003 (MS Word) : - Microsoft Word 2003 (MS Word) or later. - Microsoft Word 2003 SE (Microsoft Expression) or later. 4. Supports the following version of Microsoft Word 2007 (MS Word) : - Microsoft Word 2007 (MS Word) or later. - Microsoft Word 2007 SE (Microsoft Expression) or later. 5. Supports Microsoft Office 2000 (MS Word), Microsoft Office 2002 (MS Word) and Microsoft Office 2007 (MS Word). 6. A beginner is guaranteed to be able to use the MathWriter within a few hours. 7. Provides advanced functions with the purpose of providing more valuable facilities to the user. 8. MathWriter supports numerous functions to produce complex expressions. 9. Uses MathML (Math Markup Language) code for the production of the mathematical expressions. 10. Allows for the addition of new functions, which makes it possible for all users to obtain more valuable facilities. MathWriter Basic User Instruction 1. When opening the MathWriter, the first menu window displayed will be "Basic Settings". Click on the "Basic Settings" menu item, and you will obtain a window that will list the basic settings for the basic features of the MathWriter. If there is an existing registration number and the default user name on your computer, you may want to use these settings. 2. The "Basic Settings" window will appear on the screen. In the settings on the right hand side of the window, you will see various settings about the basic functions of the program. Click on the "Registration Number" menu item, and then click on the "Add New" menu item. 3. In this window, you will see the "Registration Number" and "User Name" for your account. You may want to use these settings. If you want to use a new registration number and the default user name, you may want to click on the "Create Registration Number" menu item. 4. After you have entered

## What's New In?

-Abacus MathWriter is a tool that is used in conjunction with Microsoft Word or other text editing tools that support bitmap images to produce documents that contains mathematical expressions. Expressions are produced from MathWriter as bitmap images, which may then be imported by Word as "pictures". -the construction of an expression, on the Construction Panel, and -the conversion of this expression to a bitmap image using the Save Image Panel. -Facilities are provided at each stage for saving the work. Expressions are saved into the " Expressions " sub-folder as \*.exp, and images are saved in the "Images" sub-folder as \*.bmp. -In order to obtain the best printer resolution, the diagrams are initially constructed on the Construction Panel in large size, and then reduced in size by the Save Image Panel for use in Word. -Key Features: -Conversion of expressions to bitmaps -Save work in large, intermediate or reduced size -Conversion to expression diagrams in multiple formats (A-Z only) -Mathematical symbols and diagram symbols are recognized by Windows -MathWriter can be loaded and operated in Windows DOS -MathWriter can be operated in Windows 32 or Windows 64 bit -2 document files are created: the expression file and the image file -MathWriter includes an example of the types of expressions that can be produced -MathWriter can be installed and run from a floppy disk Abacus MathWriter 1.0.7 Update (Trial) The trial version includes a set of documents and the basic functionality of the program. -The Trial version contains an example of the types of expressions that can be produced -The demo version contains a sample of documents to be generated using the program. -Trial version has been thoroughly tested. The demo version has not been tested and may contain errors. GSC-800 is a software that is designed for the control of the programme-synchronous controller (PLC) GSC-800. It is compatible with the Siemens GSC-800 controllers. Features: -Implemented with SQL and only one import and one export type to record configuration information of the Siemens GSC-800 -Ability to view all settings of all Siemens GSC-800 programs in a table -Fast and easy way to change the definition of the programm -Display of the program automatically as the defined record in the output database -Installation package -Transaction log of installation, maintenance and programming -Status of the program and copy of the program document (CAB file) -Operation of the Siemens GSC-800 controller through the serial port -Reliability: the program is in a fixed state on the basis of the factory configuration of the controller. Simens Automation System (SimAS) is a suite of applications designed to automate the life cycle of
