This invention relates to a hydraulic braking system and, in particular, to a hydraulic braking system for use with hydrostatically coupled bicycles. More specifically, this invention relates to a hydraulic braking system for use with hydrostatically coupled bicycles. Hydrostatically coupled bicycles are well known in the art. For example, U.S. Pat. No. 4,811,970, of which the inventor of the present invention is a co-inventor, discloses hydrostatically coupled bicycles. In hydrostatically coupled bicycles, there is a rear wheel disposed on each side of the bicycle. Each rear wheel is positioned so that the rear wheel rotates together and is coupled for rotation and moves together. Moreover, a portion of each rear wheel is maintained in hydrostatic communication with a portion of the bicycle frame. In hydrostatically coupled bicycles, because the rear wheels are retained in the hydrostatic communication with the bicycle frame, there is a hydraulic coupler arranged to couple the rear wheels together in a manner that allows the rear wheels to move together, yet remain coupled together, thus providing an effective coupling of the rear wheels with one another. In conventional hydrostatically coupled bicycles, the rear wheel couple has typically comprised one of two arrangements. The rear wheel couple is typically positioned substantially between the bicycle front forks of the bicycle. In this position, the rear wheel couple is coupled directly to the bicycle frame through one or more frame members. Additionally, in this position, the rear wheel couple is mechanically connected to the bicycle frame and is mechanically prevented from having a net effect of rotating the bicycle frame. However, in this position, there are a number of drawbacks. For example, if the rear wheel couple encounters a substantial foreign object, it is likely that the rear wheel couple can break the bicycle frame of the bicycle. This is due to the fact that the rear wheel couple is attached directly to the bicycle frame and is coupled together by means of the bicycle frame. Thus, if the rear wheel couple encounters a substantial foreign object, the front bicycle forks will tend to rotate and may break the rear wheel couple. Additionally, when the rear wheel couple encounters a substantial foreign object, the rear wheel couple is mechanically prevented from rotating the bicycle frame. This causes the rear wheel couple to drag on the foreign object, which may cause damage to the object. Another drawback with positioning the rear wheel couple directly between the bicycle front forks, is that the bicycle is required to have a relatively large wheel base, so that the rear wheel

Nihilist (album) Nihilist is a 1977 studio album by the English rock band the Buzzcocks. It was released on the band's own label Buzz Records in the UK and Sire Records in the US. It was the Buzzcocks' first release on their own label. Recording Shortly after the band released their last album, Pills 'n' Thrills and Bellyaches (1976), singer Howard Devoto joined the band. This was after they had grown increasingly dissatisfied with the record label which they were then on. Feeling that they could shape the band's sound, they decided to take matters into their own hands and set about managing their own music. With Devoto in tow, they set about recording an album. Painted on their own terms, Nihilist was a transitional album between the band's 1970s heyday and their subsequent 1977-78 albums That's It and Never Mind the Bollocks. On the one hand, it re-established the Buzzcocks as the only British band in existence, whose music is not rooted in American or British styles. Yet, it also contained the band's first use of synthesizers, which Devoto brought in to help embellish the song structures. On the album, the band marked a turning point from their English roots to a more mainstream, more American-influenced sound. Although it was less successful at the time, the album has since gone on to become something of an underground classic. In the 1992 book Punk: A Local View, author Graham Smith described the album as "one of the best albums ever made by a punk band". Release On their own label Buzz Records, the album was released on LP in 1977. However, in the US, Nihilist was released on Sire Records. An alternative take on "This is the Way" was released as a single, backed by the B-side, "The Overcoat". It was a US Top 40 hit in June 1978, making it the Buzzcocks' first single in America. Although credited with being the first single released on a punk label, Sire Records was actually founded in 1976, following the first US release of Ramones' Ramones from the Bomp! label. Track listing All songs written by Howard Devoto, Pete Shelley and Buzz "Love Bomb" – 4:37 "This Is the Way" – 3:19 "Play It Safe" – 3:
