Drive Write Checker is an extremely lightweight utility designed to easily check the number of reads and writes applied to the surface of your drives. It lets you quickly check the number of read/writes that have been applied to your drives. In case you have more than one, you can run different checks on them separately. It is a very easy to use program, as the user interface is extremely intuitive. The interface includes a set of charts showing the number of

read/writes in a simple format. In case you find the results peculiar, you can view a detailed summary of the readings with a few clicks. The application comes in very handy if you want to check the usage of your drives, including internal and external ones. You can scan multiple drives at once, and you have the option of running several checks. This utility has been designed to work on Windows operating systems, and it is available in an English version as well as in a Spanish one. It's a good tool that can help you in case you're searching for

something like this. Author: María Gabriela Núñez Download: PS: If you haven't done so yet, you can visit the developer's page to learn more about him or her:

Additional: In the option menu of the program, you'll find the following settings: Swipe Tests: If you wish to force the application to run in Swipe mode, select the Swipe Tests option and change the time limit from 5 seconds to 30 seconds. Low Level: In case you'd like to scan low level sectors of your drives, select this option and type the size in KB. Text Search: If you wish to search

the names of all the sectors on your drives, select this option and type a search term. Update Daily: This option will let you run the application every day to check the number of read/writes of all the drives you've chosen. Basic Usage: Select this option if you'd like to scan the usage of drives you've already chosen, without having to add them to the program. Export: By selecting this option, you'll be able to export your results to a CSV file, which you can easily use to save or send them to someone in another location. How to run Drive Write

Checker? Unzip the application and run it by clicking on the setup file. Then,
