### **What's New In?**

[\*] Internet TV and Radio is a music player and a radio stations web search tool. [\*] You can browse a radio stations list and view the most popular online radio stations. [\*] Look for channels from all over the world (no need to change your country settings), the type (radio or TV) and search for them by name or keyword. [\*] Adjust the volume (adjust the UI slider), switch to full screen mode or zoom in and out. [\*] You can set the position of the video (center or left), select the aspect ratio and video size. [\*] You can also use a search function to find channels (by name or genre). [\*] The app features a playlist and you can sort channels in a list. [\*] Choose the quality (low, high, excellent), set the video border color, set a station as a favorite and configure options. [\*] Choose the connection speed, set the multicast mode and allow the player to receive multicast streams. [\*] You can also add, edit or delete a station, disable the link to the recorder application and configure options when it comes to

performance (e.g. set the video border color). [\*] The app is very simple to use. You can use the Help file or access the documentation via a link in the app. [\*] Solway's Internet TV and Radio was tested on the latest firmware version available for the STB (version 1.0). [\*] Solway's Internet TV and Radio includes a support page with technical details and FAQs. [\*] Supported codecs: MP3, OGG, WMA, AAC [\*] When recording audio, the app creates zero-byte audio tracks and you cannot listen to songs. [\*] The app uses 20.50 MB of free space. [\*] In terms of performance, the app worked as expected.

## **System Requirements:**

This addon is not supported on Windows systems (OSX support is work in progress). How to Install 1) Copy the file to your data directory. 2) Run the mod from the menu or mod manager. 3) Setup and Enjoy! Updated: 3/25/2018 Changelog 3/24/2018 Updated to latest version of graphics and textures (v2.01) Updated the "Display" function to be more efficient. Added an option to turn off shadow blending
